

## Homework Expectations

- 1) Check every answer! The reason I give problems with the answers is so that when you make a mistake, you can check the answer to make sure you did the problem correctly and ask a question about it if you can't figure it out. Always check every answer! I will deduct heavily for unchecked answers.
- 2) Show your work! You need to show how you got your answers. Show what formulas you are using. If I see an answer without the supporting work, I will count it wrong.
- 3) Check carefully for any problem specifications on how to give your answer. If it says to round your answer off to three places, make sure you do so!
